

Hrishabh Tripathi

Data Engineer | Azure | Databricks | Snowflake | SQL | Power BI
tripathihrishabh1@gmail.com | +91 9650133543 | linkedin.com/in/hrishabh-tripathi-969359188

PROFESSIONAL SUMMARY

Experienced Data Engineer and BI & Analytics professional with ~4 years of experience designing scalable ETL/ELT pipelines, data warehouses, and analytics solutions. Skilled in Azure Data Factory, Azure Databricks, Snowflake, PySpark, and advanced SQL for building reliable, high-performance data platforms. Experienced in developing Power BI dashboards and Python-based automation solutions that improve operational efficiency and reduce manual effort. Strong background in data modeling, workflow orchestration, cloud technologies, and production support across enterprise environments.

TECHNICAL SKILLS

Data Engineering & Processing: Azure Data Factory, Azure Databricks, ETL/ELT Pipelines, Informatica PowerCenter, PySpark, Data Transformation

Database & Querying: Advanced SQL, Snowflake, Azure SQL Database, Oracle SQL, Db2, Query Optimization, Data Modeling

Data Warehousing & Storage: Azure Data Lake Gen2, Azure Blob Storage, Azure Synapse, Microsoft Fabric

Business Intelligence & Automation: Power BI, DAX, Dashboard Development, Reporting Automation, Advanced Excel, Python (Tkinter, ttkbootstrap), Selenium, Power Automate, Terraform, PowerShell, Bash, VBA

Orchestration & Workflow: Control-M, Tidal, Airflow, Dependency Management

Cloud Platforms & Mainframe: Microsoft Azure, AWS, Databricks, ISPF, JCL, COBOL, VSAM, GDG, TSO, FTP, Batch Processing

Development Practices & Tools: Agile, Jira, Git, Incident Management, Change & Release Management, DevOps Concepts, Linux, Windows, Java (Eclipse), IBM WebSphere

AI & Machine Learning: Azure OpenAI, LLM & RAG, Agentic AI, Azure AI Services, Prompt Engineering

WORK EXPERIENCE

DXC Technology

Analyst 1 - Data Engineer | Hybrid | Aug-2022 - Present

- Designed and implemented scalable ETL/ELT pipelines using Azure Data Factory and Informatica to ingest data from multiple on-premises and cloud sources into Azure Data Lake and downstream data stores, enabling reliable analytics, reporting, and business intelligence solutions.
- Automated and optimized end-to-end data workflows using Azure Data Factory pipelines, improving orchestration efficiency, reducing manual intervention, and ensuring reliable, timely data delivery across enterprise applications and reporting systems.
- Monitored and maintained data pipelines across Development, Integration, UAT, and Production environments, ensuring high availability, operational stability, and adherence to enterprise SLA requirements.
- Improved data processing performance by 25% through advanced SQL optimization, transformation tuning, and workload optimization across Azure SQL and Snowflake environments.
- Designed and developed Snowflake data warehouse solutions, including schema design, table management, complex SQL transformations, and data modeling to deliver curated, analytics-ready datasets for reporting and business intelligence.
- Integrated and transformed data from diverse enterprise sources into Snowflake using SQL joins, data modeling techniques, and structured transformations, ensuring high-quality, trusted datasets for downstream consumption.
- Utilized Azure Databricks and PySpark to develop scalable data transformation solutions, efficiently processing large-volume datasets and implementing complex business transformation logic.
- Led migration of data from on-premises platforms to Azure cloud services including Azure Data Lake Gen2 and Azure Blob Storage, ensuring data integrity, scalability, security, and efficient storage management.
- Designed and developed enterprise automation solutions using Python (Tkinter, ttkbootstrap), Selenium, Power Query, VBA, and SQL scripting, reducing manual effort by over 90%, improving productivity, and streamlining operational processes.
- Developed and maintained enterprise Power BI dashboards and reporting solutions including Incident Management, Jira Tracking, Resource Utilization, Innovation Programs, WBS Tracking, Account Demand, and Change Management reporting, enabling data-driven business and operational decision-making.
- Designed, published, and managed a centralized Power BI App to consolidate reporting solutions, automate dataset refreshes, streamline user access, and improve reporting governance across business stakeholders.
- Developed automated Incident and RITM alerting solutions using Power Automate and Microsoft Teams, enabling real-time notifications, faster issue identification, and improved response times for support teams.
- Orchestrated and monitored batch-processing workflows using Control-M and Tidal, managing complex job dependencies and ensuring reliable execution of critical business and data-processing workloads.
- Implemented monitoring, logging, validation, reconciliation, and batch-tracking frameworks to ensure data quality, reliable pipeline execution, proactive issue detection, and operational stability.
- Collaborated with cross-functional teams in Agile Scrum environments using Jira, supporting DevOps practices including version control, sprint planning, deployment coordination, release management, change implementation, and migration of source code repositories from CVS to Bitbucket to strengthen security compliance and support vulnerability remediation initiatives.
- Supported production incidents, deployments, and change/release management activities by performing root cause analysis, environment validation, log analysis, and rapid issue resolution to ensure business continuity and system reliability.

PROJECTS

- **Azure Data Pipeline (Azure Data Factory + Databricks + Snowflake):** Designed and implemented ETL/ELT pipelines using Azure Data Factory to ingest data from APIs, databases, and cloud storage into Azure Data Lake and Snowflake. Utilized Azure Databricks (PySpark) for scalable data transformation and processing.
- **Enterprise Power BI Reporting Platform:** Developed and maintained Power BI solutions for Incident Management, Jira, Resource Utilization, Innovation Program, WBS, Account Demand, and Change Project tracking. Published and managed reports through a centralized Power BI App with automated refresh scheduling.
- **Incident & RITM Alert Automation (Power Automate + Microsoft Teams):** Developed automated workflows for Incident and RITM monitoring, delivering real-time Microsoft Teams notifications and reducing manual monitoring effort.
- **Reporting & Validation Automation Suite (Python + SQL + Excel):** Built automation tools using Python, SQL, Power Query, and Excel for reporting, validation, and reconciliation processes, reducing manual effort by over 90%.
- **Operational Support & Mainframe Automation Tools:** Built Python-based utilities for Mainframe FTP operations including job status monitoring, JCL library syncing, and dataset management. Developed tools for XML processing, batch monitoring, incident and OneForm reporting, and Eclipse automation using Tkinter, ttkbootstrap, Selenium, and SQL.

INTERNSHIP EXPERIENCE

Research Design and Standards Organization

Data Intern | Jul-2021 - Aug-2021

Designed and implemented a Railway Reservation System to manage ticket bookings, cancellations, passenger records, and seat availability efficiently.

Durapid Technologies Private Limited

Web Development Intern | Feb-2021 - Apr-2021

Designed webpages for startup clients based on requirements and layout specifications. Collaborated with clients to determine design direction and conducted research on new software and design concepts.

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ900)
- Microsoft Azure Data Fundamentals (DP900)
- Microsoft Azure Data Engineer Associate (DP203)
- Microsoft Power BI Data Analyst (PL300)
- Microsoft Certified: Azure AI Fundamentals (AI900)
- AWS Cloud Practitioner Certified
- AWS Certified Data Engineer - Associate
- AWS Certified AI Practitioner
- SQL Boot camp certificate
- Linux the complete guide
- Microsoft Certified: Fabric Data Engineer Associate (DP700)
- Snowpro Core Certified
- Microsoft Certified: Power Platform Developer Associate (PL400)
- Databricks Certified Data Engineer Associate
- LOMA281 certified

EDUCATION

Jaypee University of Information Technology

B.Tech (HONS) - Computer Science & Engineering | 2018 - 2022 | GPA: 8.5 CGPA

ACHIEVEMENTS

- Received the FY24 Q4 Champs Award from DXC Technology for outstanding performance and delivery excellence.
- Received the FY26 H1 Champs Award from DXC Technology for consistent high performance and impactful contributions.

LANGUAGES

English, Hindi
